What's New in the?

Re-use your models and keep the models consistent across projects. Export models from one project and import them back into your next project, as a set, without having to update the model's drawing. (video: 3:25 min.) Multi-view applications: Bring your work to life in other applications with multi-view drawing. Use 2D views to create 3D models, and then view those models in 3D in other applications. (video: 3:35 min.) Model Editing and Model Manipulation: Start modifying models faster with the new Model tab. Find the model you need with the new search tool and right-click to activate a drop-down list of specific objects. (video: 1:40 min.) Introducing floating objects. Apply a point, path, or solid appearance with a point or path object, and adjust the floating behavior with ease. Drag, drop, and animate with the new floating panel. (video: 1:20 min.) Manipulate multiple objects at the same time by using the new multi-edit command. Move, copy, and rotate multiple objects in a single operation. (video: 1:50 min.) More precision with the compass tool. Selectively enable and disable the compass tool to better get the view angle you need. (video: 1:10 min.) Command-Line Interface: Generate basic AutoLISP code directly from the command line. Use the new cad command to generate code from the command line or create self-documenting macros using AutoLISP. (video: 4:20 min.) Use the more advanced cad command to create AutoLISP functions that can be called from Python, MATLAB, and other languages. (video: 1:05 min.) Stay organized with the new viewbar command. Display a floating window that includes all drawings, including multiple, open AutoCAD drawings, for easy navigation. (video: 1:50 min.) Powerful, native Windows PDF support with the new PDF import dialog. Share and analyze your drawings in AutoCAD and share your drawings directly with other applications. (video: 1:05 min.) Release Environment: Automate deployments to the server and simplify your release process. Setup a new release environment and load components in minutes. Automate release schedules and communication with teammates and clients. (video: 1:

System Requirements For AutoCAD:

Compatibility: Windows XP/Vista/7/8 Mac OS X 10.4+ SteamOS+ To install Ubuntu 16.04 "Xenial Xerus" on SteamOS you will need to follow this tutorial. If you have multiple accounts on Steam, please create a second account for the SteamOS install. If you already have a Ubuntu Steam install, you should be able to use the steam repo for 16.04. wget -q -O -
